BEHRINGER X AIR Q for Android

Version 1.0 (28 August 2015)

BEHRINGER X AIR Q for Android brings full personal monitor mixing to Android-powered devices for all X AIR Digital Mixers. Musicians can control their own monitor mix with full access to all input channels, either individually or through the app's MCA (Mix Control Association) faders. The app also provides channel panorama sliders to allow mixing to a stereo aux bus. Each user can group the inputs to 4 MCAs, allowing for one-fader control over a group of channels – which greatly simplifies adjustments during live performance.

Setup is simple – just download the free Android app and connect your smartphone or tablet to the X AIR mixer's wireless network. Various devices and display resolutions are supported for hassle-free performance with no additional hardware or computer requirement. Thanks to the BEHRINGER X AIR Q App, the talents on stage can now easily control their monitor mixes from their own smartphones.

KEY FEATURES

- Select the Aux Bus for your Personal Monitoring Control from your Android smartphone or tablet
- Assign any combination of inputs to any of the four available MCA (mix control association) faders in the app
- MCAs allow concurrent trimming of all assigned channel signal levels via a single fader for: more me, less band; more click track, less percussion – the choice is yours!
- Nickname your MCA selection for intuitive overview on stage
- Choose the target Aux Bus for monitoring
- Indication of stereo-linked channels and monitor buses
- Control all Channel Send Levels for all Inputs in your Aux Bus
- Control the Auxiliary Stereo Channel and all 4 Stereo Effects Return Levels in your Aux Bus
- Meter all Input Channel levels for visual feedback
- Multiple Android or iOS devices can be used simultaneously with the same console

REQUIREMENTS:

- Compatible with Android versions 2.2 or higher and X AIR Mixer firmware versions 1.09 or higher.
